SECTION II – RISK FACTOR

An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of this Issue including the merits and risks involved. Any potential investor in, and subscriber of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment in which some material respects may be different from that which prevails in other countries. The risks and uncertainties described in this section are not the only risks and uncertainties we currently face. Additional risks and uncertainties not known to us or that we currently deem immaterial may also have an adverse effect on our business. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. Additionally, our business operations could also be affected by additional factors that are not presently known to us or that we currently consider as immaterial to our operations.

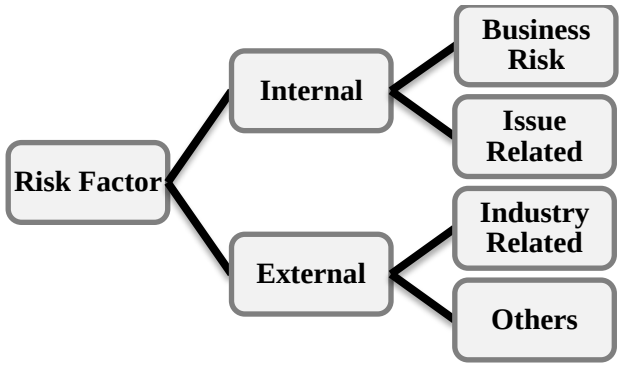

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. Unless otherwise stated, the financial information of our Company used in this section is derived from our restated financial statements prepared in accordance with Indian GAAP and the Companies Act and restated in accordance with the SEBI ICDR Regulations. To obtain a better understanding, you should read this section in conjunction with the chapters titled "Our Business" beginning on page 103, "Industry Overview" beginning on page 99 and "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on page 158 respectively, of this Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some events may not be material individually but may be found material collectively;*
- *Some events may have material impact qualitatively instead of quantitatively;*
- *Some events may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled "Definitions and Abbreviation" beginning on page 3 of this Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

2. ***We have recently shifted our business model from a service based model to a product based model with a consequent dip in revenues leading to initial losses in the financial years 2015-16 and 2016-17***

   Our Company was incorporated in the year 2000, and commenced its operations in the XBRL extensible Business Reporting Language) space in the year 2004. Until FY15, our growth was primarily driven by projects for regulators, and services for enterprises. In 2015, we began our journey to shift our business model from a service based business to a product based business.

   Over the last few years, we invested in focused product development of iFile (our regulatory filing platform), CARBON (our cloud based SaaS platform for enterprises) and DCP (our data and analytics platform).

   Most recently, we also invested in development of a product to help companies with GST compliance.

   With the shift away from services, especially on the enterprise side, our revenue from operations has declined from profit of Rs. 338.14 lakhs in financial 2014-15 to a loss of Rs 671.16 lakhs in financial year 2015-16 and further widening to loss of 904.09 lakhs in the financial year 2016-17.

   If we are not able to market our products in future, our revenue from operations may further decline. Also, for products which are not launched yet, if we are not able to complete development of our products in time, it may impact our future revenues as well. Our profit margin and cash flow may also be affected as a result of such shift in business prospects.

3. ***The quality of our customer support is important to our clients, and if we fail to offer quality customer support, clients may not use our solutions and our revenue from operations may decline.***

   Client support is critical for the successful adoption of our products, especially in the early stages of product adoption. If we are unable to provide the level of customer support to meet or exceed the expectations of our clients, we could experience a loss of clients and market share, we could fail to attract new clients, including in new geographic regions and we could also see increased service and support costs and a diversion of resources. Any of these results could negatively impact our results of operations, financial position and cash flow.

4. ***A substantial part of our business depends on clients continuing their use of our products and services. Any decline in our client retention would harm our future operating results.***

   We do not have long term contracts with most of our regulatory and enterprise clients, and therefore rely on their continued use of our products and services. As a result, client retention is an important part of our strategic business plan. There can be no assurance that our clients will continue to use our products and services to meet their ongoing needs, particularly in the face of competitors' products and services offerings. Our client retention rates may decline due to a variety of factors, including:

   - our inability to demonstrate to our clients the value of our solutions;

- the price, performance and functionality of our solutions;
- the availability, price, performance and functionality of competing products and services;
- our clients' ceasing to use or anticipating a declining need for our services in their operations;
- consolidation in our client base;
- the effects of economic downturns and global economic conditions; or
- reduction in our clients' spending levels.

If our retention rates are lower than anticipated or decline for any reason, our net sales may decrease and our profitability may be affected, which could negatively impact our results of operations, financial position and cash flow.

5. ***Our performance and growth depend on our ability to develop reference-able client relationships that will enhance our sales and marketing efforts.***

We depend on users of our solutions to generate client referrals for our services. We depend in part on the regulators, BFSI clients, enterprises and other third parties who use our products and services to recommend our solutions to their client base, which allows us to reach a larger client base than we can reach through our direct sales and internal marketing. For instance, in the regulatory space, a portion of our revenue from operations is derived from referrals by existing regulatory clients that have adopted and are using our solutions in the past. These referrals are an important source of new clients for our services.

A decline in the number of referrals we receive could require us to devote substantially more resources to the sales and marketing of our services, which would increase our costs, potentially lead to a decline in our revenue from operations, slow our growth and negatively impact our results of operations, financial position and cash flow.

6. ***Undetected errors or failures found in our products and services may result in loss of or delay in market acceptance of our products and services that affect our business operations.***

Our products and services may contain undetected errors or scalability limitations particularly when first introduced or as new versions are released. We frequently release new versions of our products and different aspects of our platform and even customize our products. Despite testing by us and by current and potential clients, errors may not be found in new products and services until after commencement of commercial availability or use, resulting in a loss of or a delay in market acceptance, damage to our reputation, client dissatisfaction and reductions in our revenue and profit margins which could negatively impact our business operations.

7. ***A failure to adapt to technological changes to address the changing demands of clients may adversely impact our business, and if we fail to successfully develop, introduce or integrate new products or enhancements to our products and services platforms, it may affect our business operations.***

Our ability to attract new clients and increase sales to existing clients will depend in large part on our ability to enhance and improve our existing products and services platforms. Our operating results would suffer if our innovations are not responsive to the needs of our clients, are not appropriately timed with market opportunities or are not brought to market effectively. In addition, it is possible that our assumptions about the features that we believe will drive purchasing decisions for our potential clients or renewal decisions for our existing clients could be incorrect. There can be no assurance that new products or services, or upgrades to our products or services, will be released on schedule or that, when released, they will not contain defects as a result of poor planning, execution or other factors during the product development lifecycle. If any of these situations were to arise, we could suffer adverse publicity, damage to our reputation, loss of net sales, delay in market acceptance or claims by clients brought against us.

Moreover, upgrades and enhancements to our platforms may require substantial investment and there can be no assurance that our investments will help us achieve or sustain a durable competitive advantage in our products and services offerings. If clients do not widely adopt our solutions or new innovations to our solutions, we may not be able to justify the investments we have made. If we are unable to develop, license or acquire new solutions or enhancements to existing services on a timely and cost-effective basis, or if our new or enhanced solutions do not achieve market acceptance, our business, results of operations and financial condition will be materially negatively impacted.

8. ***Changes in the rules and regulations to which clients or potential clients are subject may impact demand for our products and services.***
Many of our clients are subject to rules and regulations requiring certain printed or electronic communications governing the form, content and delivery methods of such communications. Changes in these regulations may impact clients' business practices and could reduce demand for our products and services. Changes in such regulations could eliminate the need for certain types of communications altogether or such changes may impact the quantity or format of communications.

9. ***Our failure to maintain the confidentiality, integrity and availability of our systems, software and solutions could seriously damage our reputation and affect our ability to retain clients and attract new business.***
Maintaining the confidentiality, integrity and availability of our systems, software and solutions is an issue of critical importance for us and for our clients and users who rely on our systems to prepare regulatory filings and store and exchange large volumes of information, much of which is proprietary, confidential and may constitute material nonpublic information for our clients. Inadvertent disclosure of the information maintained on our systems due to human error, breach of our systems through hacking or cybercrime or a leak of confidential information due to employee misconduct could seriously damage our reputation and could cause significant reputational harm for our clients. Techniques used to obtain unauthorized access to, or to sabotage, systems change frequently and generally are not recognized until launched against a target. Like all software solutions, our software may be vulnerable to these types of attacks. An attack of this type could disrupt the proper functioning of our software solutions, cause errors in the output of our clients' work, allow unauthorized access to sensitive, proprietary or confidential information of ours or our clients and other undesirable or destructive outcomes. Furthermore, our systems allow us to share information that may be confidential in nature to our clients across our offices worldwide. This design allows us to increase global reach for our clients and increase our responsiveness to client demands, but also increases the risk of a security breach or a leak of such information because it allows additional points of access to information by increasing the number of employees and facilities working on certain jobs. If an actual or perceived information leak or breach of our security were to occur, our reputation could suffer, clients could stop using our products and services and we could face lawsuits and potential liability, any of which could cause our financial performance to be negatively impacted. Though we maintain professional liability insurance that includes coverage if a cyber security incident were to occur, there can be no assurance that insurance coverage will be available, responsive, or that available coverage will be sufficient to cover losses and claims related to any cyber security incidents we may experience.

Defects or malfunctions in our IT infrastructure and applications could cause our products and services offerings not to perform as our clients expect, which could harm our reputation and business. In addition, malicious software, sabotage and other cyber security breaches of the types described above could cause an outage of our infrastructure, which could lead to a substantial

denial of service and ultimately downtimes, recovery costs and client claims, any of which could negatively impact our results of operations, financial position and cash flow.

10. ***We are exposed to foreign currency exchange rate fluctuations, which may harm our results of operations, impact our cash flows and cause our financial results to fluctuate.***

    Our financial statements are presented in Indian Rupees. However, our sales are influenced by the currencies of geographies to where we export our products. The exchange rate between the Indian Rupee and these currencies, primarily the USD, GBP, etc. have fluctuated in the past and our results of operations and cash flows have been impacted by such fluctuations in the past and may be impacted by such fluctuations in the future. As a significant part of our revenue is generated from export, we believe that price of our products may depreciate during a sustained appreciation of the Indian Rupee against the USD, GBP, etc. For example, during times of strengthening of the Indian Rupee, we expect that our overseas sales and revenues will generally be negatively impacted as foreign currency received will be translated into fewer Indian Rupees. However, the converse positive effect of depreciation in the Indian Rupee may not be sustained or may not show an appreciable impact in our results of operations in any given financial period, due to other variables impacting our business and results of operations during the same period. We currently do not hedge transactions and thus face foreign currency exchange fluctuation risk. We may, therefore, suffer losses on account of foreign currency fluctuations for sale of our products since may not be able to pass on all losses on account of foreign currency fluctuations to our customers.

11. ***We have in the past entered into related party transactions and may continue to do so in the future and there can be no assurance that we could not have achieved more favorable terms if such transactions had not been entered into with related parties.***

    In the ordinary course of our business, we have entered into transactions with related parties that include our Directors, Group Companies and Subsidiaries. These transactions primarily relate to investments, loans and advances, promotional expenses, etc.

    While we believe that all related party transactions that we have entered into are legitimate business transactions conducted on an arms' length basis, there can be no assurance that we could not have achieved more favorable terms if such transactions had not been entered into with related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance to you that any future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations and cash flows. Further, any future transactions with our related parties could potentially involve conflicts of interest which may be detrimental to our Company. For further details regarding our related party transactions, see "*Related Party Transactions*" as disclosed on page 155.

12. ***Our international operations may expose us to complex management, foreign currency, legal, tax and economic risks. These risks may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.***Other than the bulk of our operations which take place in India, we also function through our Subsidiaries in Singapore, USA and Italy. As a result of our existing and expanding international operations, we are subject to risks inherent to establishing and conducting operations in international markets, including:

- ✓ cost structures and cultural and language factors associated with managing and coordinating our international operations, including establishing new relationships with channel partners;

- ✓ compliance with a wide range of regulatory requirements, foreign laws, including immigration, tax laws where we usually rely on the opinions of experts on such matters, including in relation to transfer pricing norms and applicability of the relevant provisions of double taxation avoidance agreements, but which often involve areas of uncertainty;

- ✓ difficulty in staffing and managing foreign operations;

- ✓ potential difficulties with respect to protection of our intellectual property rights in some countries; and

- ✓ Indian regulations and restrictions on export and import of solutions.

The risks stated above and the constantly changing dynamics of international markets could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Further, our exposure to foreign currency risk arises in respect of our non-Indian Rupee-denominated trade and other receivables, trade payables, and cash and cash equivalents. While our presentation and functional currency is the Indian Rupee, we have trade receivables and trade payables denominated in other foreign currencies such as the USD. Any fluctuation in the value of the Indian Rupee may affect our results of operations and cash flows.

13. The Company requires a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of its business.

The Company requires a number of approvals, licenses, registrations and permits in ordinary course of its business. Additionally, the Company would need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. The Company cannot provide an assurance that the relevant authorities will issue any or all requisite permits or approvals in the timeframe anticipated by it, or at all. If such permits and licenses are not renewed, the Company's business operations and reputation may be adversely affected. Further, some of the Company's permits, licenses and approvals are subject to several conditions and the Company cannot provide an assurance that the Company will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure to renew the approvals that have expired, or to apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to the Company, could result in delaying the operations of its business, which may adversely affect the Company's business, financial condition, results of its operations and prospects.

The Company requires several statutory and regulatory permits, licenses and approvals to operate our business, some of which we have either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. The Company cannot assure you that the relevant authorities will issue any or all requisite permits or approvals in the timeframe anticipated by us, or at all. If such permits and licenses were not renewed, our business operations and reputation may be adversely affected. Further, some of the Company permits, licenses and approvals are subject to several conditions and the Company cannot assure you that the Company will be able to continuously meet such

conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals.

14. Our financial results may vary from time to time, due to fluctuations in demand for our products, making it difficult to project future results.

Demand for our products may fluctuate from period to period due to factors such as general economic conditions, competition, product obsolescence, technological change, shifts in buying patterns, financial and business conditions of our current and potential customers and levels of Internet usage. A variety of factors may hence cause volatility in our financial results, making any projections of future results uncertain. Such factors include but are not limited to fluctuations in demand for or pricing of our products, the expectation by our channel partners of higher incentives, timing of orders and payments, issues relating to alliances with third parties, product and geographic mix and timing of new products. There are also particular factors driving demand for each of our specific products. For instance, demand for CARBON in a country emanates from regulators not offering free tools to filers. A change in the factors driving demand for our products generally or for a particular product could adversely affect our revenue, financial condition, results of operations and cash flows.

15. Our business, prospects and results may be diminished if we lose the services of our senior management and/or key personnel.

Our success depends largely on the efforts, expertise and abilities of our senior management and key personnel. Our senior management is important to our business because of their experience and knowledge of the industry. Owing to the technical and specialized nature of our work, we are also significantly dependent upon our technology and personnel. Changes in management may be disruptive to our business and might also result in our loss of unique skills and the departure of existing employees and/or customers. In addition, there is intense competition for qualified domain and technical personnel in India. To effectively compete, we may be required to offer higher compensation and other benefits which could materially and adversely affect our financial condition, results of operations and cash flows. In the future, we may not be able to attract and retain the qualified personnel necessary for the conduct and further development of our business which could affect our ability to execute our business strategy. If one or more of our senior management team or key personnel are unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly, or at all, which could have a material adverse effect on our business, prospects and financial results. If any of our key employees were to join a competitor or to form a competing company, some of our channel partners and end users might choose to work with and/or use the solutions of that competitor or new company instead of our own thereby also adversely affecting our business, prospects and financial results.

16. A portion of the proceeds of the Issue will be utilized for pre-payment of loans availed by our Company from our Chartered Finance & Leasing Limited.

One of the Objects of the Issue is for pre-payment of loan aggregating to Rs. 300.00 lakhs availed by our Company from Chartered Finance & Leasing Limited at rate of 12.00% interest p.a. The funds were utilised by our Company for business purpose and the loan was sanctioned in the financial year 2017-18**.** For further details, please see the chapter titled "Objects of the Issue" beginning on page 87 of this Prospectus.

17. The industry in which we operate is employee intensive and our operations may be materially adversely affected by work stoppages or increased salary demands by our employees.

Our industry is employee intensive and is dependent on skilled employee force for carrying out our operations. Shortage of skilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our employees in the past; however there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

18. ***Our historical revenues have been significantly dependent on few customers. We have not entered into any long term or definitive agreements with our customers. If our customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

A significant proportion of our revenues have historically been derived from a limited number of customers. Over the last three financial years, our top ten customers contributed 82.51%, 84.18% and 90.81% of our total revenue from operations for financial year 2016-17, 2015-16 and 2014-15 respectively**.** The loss of orders from any of these significant customers will result in a considerable reduction in our revenue. Significant dependence on them may increase the potential volatility of our results of operations and exposure to individual contract risks. In the event that any of these customers discontinue purchase of products from us, our results of operations and financial condition may be adversely affected.

Any failure to meet our customers' expectations could result in cancellation of orders. There are also a number of factors other than our performance that are beyond our control and that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates or replace their existing products with alternative products, any of which may have an adverse effect on our business, results of operations and financial condition.

19. ***We face competition from other players, which may affect our business operations and financial conditions.***

We compete in RegTech industry on the basis of the quality of our products, price, and services. The industry in which we operate is highly competitive and factors affecting our competitive success include, amongst other things, price, brand recognition and reliability. Our competitors vary in size, and may have greater financial and other resources than us and certain of our competitors may have a longer history of established businesses and reputations in the overseas market as compared with us. Competitive conditions in some of our segments have caused us to incur lower net selling prices and reduced gross margins and net earnings. New competitors may include foreign-based companies and domestic companies who could enter our markets. Our failure to compete effectively, including any delay in responding to changes in the industry and market, together with increased spending on advertising, may affect the competitiveness of our products, which may result in a decline in our revenues and profitability.

20. ***Our Company has negative cash flows from its investing activities as well as financing activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Our Company had negative cash flows from our investing activities as well as financing activities in the previous year(s) as per the Restated Standalone Financial Statements and the same are summarized as under:

(Rs. in lakhs)

Particulars	For The Year Ended March 31,				
	2017	2016	2015	2014	2013
Cash Flow from / (used in) Investing Activities	(524.26)	(1,157.81)	(802.70)	(233.74)	(2,021.07)
Cash Flow from / (used in) Financing Activities	(426.16)	651.37	(364.19)	(977.29)	773.74

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

21. ***Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an adverse effect on our business, results of operations and financial condition. The success of our business will depend greatly on our ability to effectively implement our business and growth strategy.***

Our growth strategy requires us to develop and strengthen relationships with existing customers and attract new customers for our business who may drive high volume orders on an on going basis.

Our success in implementing our growth strategies may be affected by:

- our ability to increase our customer base;
- our ability to compete effectively with existing and future competitors,
- changes in the Indian or international regulatory environment applicable to us.

Many of these factors are beyond our control and there is no assurance that we will succeed in implementing our strategy. Separately, our growth strategy also involves expanding into new geographic markets which will involve additional risk.

While we have successfully executed our business strategy in the past, there can be no assurance that we will be able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could adversely impact our results of operations. We expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and growth strategy could have a material adverse effect on our business, financial condition and profitability.

22. ***Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect the Company's business, operations and financial performance.***

The business, operations and financial performance of the Company could be adversely affected by changes in law, or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations in India, applicable to it and to its business.

The governmental and regulatory bodies in India may notify new regulations and/or policies, which may require the Company to obtain approvals and licenses from the Government and other

regulatory bodies, or impose onerous requirements and conditions on its operations, in addition to those which the Company is undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on the Company's business, financial condition and results of its operations.

The Government of India has made two major reforms in Indian tax laws, namely the provisions relating to General Anti-Avoidance Rules (GAAR) and goods and services tax. As regards GAAR, the provisions were introduced in the Finance Act, 2012 and have come into effect from April 1, 2017. The GAAR provisions intend to catch arrangements declared as "impermissible avoidance arrangements", which includes any arrangement, the main purpose or one of the main purposes of which is to obtain a tax benefit and which satisfies at least one of the following tests: (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, which are not ordinarily employed for bona fide purposes. If GAAR provisions are invoked, then the tax authorities have wide powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The Government of India has implemented a comprehensive national goods and services tax ("GST") regime with effect from July 1, 2017 that combines taxes and levies by the Central and State Governments into a unified rate structure. Hence, GST has replaced the indirect taxes on goods and services, such as central excise duty, service tax, customs duty (excluding basic customs duty), central sales tax, state VAT, entertainment tax, luxury tax, purchase tax and surcharge currently being collected by the Central and State Governments. The implementation of this rationalized tax structure may create uncertainty. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions and the Company's tax efficiency.

As the taxation system is undergoing significant overhaul, its consequent effects on the Company cannot be determined at present and there can be no assurance that such effects would not adversely affect the Company's business and future financial performance.

The Company has not determined the impact of such proposed legislations on its business. In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations governing the Company's business, operations and structure could result in it being deemed to be in contravention of such laws and/or may require the Company to seek approvals and/or could result in an increase in the Company's tax payments (prospectively or retrospectively) and/or subject the Company to penalties, which could affect business operations. The Company may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for the Company to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

In addition, if international tax reforms such the Base Erosion and Profit Sharing ("**BEPS**") measures of the Organization for Economic Co-operation and Development are adopted by India,

the Company may be subject to enhanced disclosure and compliance requirements and a resultant increase in its costs related to such compliance.

23. ***The Company may be unsuccessful in protecting its intellectual property rights in India. Unauthorized use of intellectual property may result in the development of technology, products or services which compete with the Company's products. The Company may also be subject to third-party claims of intellectual property infringement.***

The Company's intellectual property rights are important to the Company's business. The Company relies on a combination of copyright and trademark laws, trade secrets, confidentiality procedures and contractual provisions to protect its intellectual property. However, the Company cannot be certain that the steps taken by it will prevent unauthorized use of its intellectual property. Furthermore, the laws of India do not protect proprietary rights to the same extent as laws in certain other countries (including the United States). Therefore, the Company's efforts to protect its intellectual property may not be adequate. The Company's competitors may independently develop similar technology or duplicate products or services offered by the Company. Unauthorized parties may infringe upon or misappropriate the Company's products, services or proprietary information.

The misappropriation or duplication of the Company's intellectual property could disrupt the Company's ongoing business, distract its management and employees, reduce its revenue and increase expenses. The competitive advantage that the Company derives from its intellectual property may also be diminished or eliminated. The Company may need to litigate to enforce its intellectual property rights or to determine the validity and scope of the proprietary rights of others. Any such litigation could be time-consuming and costly. As the number of copyrights and other intellectual property rights in the industry in which the Company is engaged increases, and as the coverage of these rights increases, the Company believes that companies in this industry will face more frequent infringement claims. Defending against these claims, even if not meritorious, could be expensive and divert the Company's attention and resources from operating the Company. Also, there can be no assurance that, as the Company's business expands into new areas, it will be able to independently develop the technology necessary to conduct its business or that it can do so without infringing on the intellectual property rights of others.

Although the Company believes that its intellectual property rights do not infringe on the intellectual property rights of any other party, infringement claims may be asserted against the Company in the future. If the Company becomes liable to third parties for infringing their intellectual property rights, the Company could be required to pay a substantial damage award and be forced to develop non-infringing technology, obtain a license or cease selling the applications or products that contain the infringing technology. The Company may be unable to develop non-infringing technology or to obtain a license on commercially reasonable terms, or at all. Further, the Company may be required to provide indemnification to clients for third-party breaches of intellectual property pursuant to the Company's contracts with such parties.

24. ***We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.***

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. We currently carry no products liability insurance with respect to our products. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.

Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products, including those arising from a drop in quality of merchandise from our vendors, mishaps resulting from the use of our products, or any other unforeseen events could affect our reputation and our results from operations.

25. ***Some of our Group Companies have negative net worth and have incurred losses in the previous financial years***.

Sustained financial losses by our Group Companies may not be perceived positively by external parties such as customers, bankers, suppliers etc, which may affect our credibility and business operations. The following of our Group Company has incurred losses in previous years:

26. ***Our lenders have charge over our movable and immovable properties in respect of finance availed by us.***

We have provided security in respect of loans / facilities availed by us from banks and financial institutions by creating a charge over our movable properties and immovable properties leased by us. The total amounts outstanding and payable by us as secured loans were Rs. 1,754.17 lakhs as on March 31, 2017 based on standalone restated financials. In the event we default in repayment of the loans / facilities availed by us and any interest thereof, our properties may be subject to forfeiture by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the "*Financial Indebtedness"* please refer to page 165 of this Prospectus.

27. ***Our Promoters have provided personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.***

Our Promoters have provided personal guarantees in relation to certain loan facilities availed by us. In the event that any of these guarantees are revoked, the lenders for such facilities may

require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

28. ***Our Promoters have interests in our Company other than the reimbursement of expenses and normal remuneration or benefits. Any such interests may result in a conflict of interest, which may have an adverse effect on our business.***

Our Promoters may be deemed to be interested in our Company, in addition to regular remuneration or benefits and reimbursements of expenses, to the extent of Equity Shares held by them, their dividend or bonus entitlement, benefits arising from their directorship in our Company, if any. Therefore, some of the above interests may conflict with the duties of these persons as Promoters / Directors of the Company. For further details, please see the chapters titled *"Our Management"* and *"Our Promoters and Promoter Group"* beginning on pages 131 and 146, respectively of this Prospectus.

29. ***Our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits and terrorism. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.***

Our Company has obtained insurance coverage in respect of certain risks. Our significant insurance policies consist of Standard Peril and Policy for building, plant & machinery, office equipment, furniture & fixtures, burglary & robbery cover, money insurance cover, electronic equipment cover, directors and officer's liability. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits, losses due to terrorism, etc. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

30. ***We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the 'Objects of the Issue'. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled *"Objects of the Issue"* beginning on page 87 of this Prospectus.

31. ***Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see *"Dividend Policy"* on page 156 of this Prospectus.

32. Our Company's management will have flexibility in applying the proceeds of this Issue within the parameters as mentioned in the chapter titled 'Objects of this Issue' beginning on page 87 of this Prospectus.

We intend to use Net Issue Proceeds towards sales and marketing, product development, repayment of loan and general corporate purposes. We intend to deploy the Net Issue Proceeds in financial year 2017-18 and 2018-19 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. There can be no assurance that the funds raised from the Issue may not remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled *"Objects of the Issue"* beginning on page 87 of this Prospectus.

33. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs. 10,000 lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

34. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

Issue Specific Risks

35. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Domestic and international economic, legal and regulatory factors unrelated to our performance.

36. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the section titled *"Risk Factors – Prominent Notes"* on page 17 of this Prospectus.

External Risk Factors

***Industry Risks*:**

37. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

Other Risks

38. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange

and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a stock exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India. By way of the Finance Act, 2017, the Government of India has proposed to introduce certain anti-abuse measures, pursuant to which, the aforesaid exemption from payment of capital gains tax for income arising on transfer of equity shares shall only be available if STT was paid at the time of acquisition of the equity shares. While the said provision has not been notified as on date, it is expected to take effect from April 1, 2018 and will, accordingly, apply in relation to the assessment year 2018-19 and subsequent assessment years. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

39. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.

As stated in the reports of the Auditor included in this Prospectus under chapter *"Financial Statements as restated"* beginning on page 157, the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

40. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

41. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled *'Industry Overview'* beginning on page 99 of this Prospectus. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

42. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

43. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

44. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

45. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

46. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

OVERVIEW OF REGTECH INDUSTRY

"Regtech" is "the use of new technologies to solve regulatory and compliance requirements more effectively and efficiently." Recent innovations in technology indicate that we are only at the early stages of a regtech market, with more development of new solutions in the near future.

The ambitious regulatory reform agenda implemented after the financial crisis has closed loopholes in the financial regulatory framework, but has also significantly increased compliance costs. Successful regtech companies would then be those that could help reduce compliance burden without yielding on the effectiveness of compliance and oversight regimes.

Much of the literature on Regtech focuses on the regulated ignoring the opportunities at the Regulator's end which is really where the story begins. It is the desire of a regulator to leverage the emerging digital world by re architecting the disclosure framework that is the starting for any analysis of the Regtech opportunity.

(Source: Regtech in Financial Services - www.iif.com)

The following issues in compliance and regulatory reporting could benefit from the development of regtech solutions:

Risk data aggregation as required for capital and liquidity reporting, for RRP and for stress testing, implies the gathering and aggregation of high quality structured data from across the financial group. It is complicated by definitional issues and the use of incompatible and outdated IT systems.

Modelling, scenario analysis and forecasting as required for stress testing and risk management is increasingly complex and demanding in terms of computing power and labor and intellectual capacity, due to the vast array of risks, scenarios, variables and methodological diversity that needs to be included.

A bottleneck in **monitoring payments transactions** (particularly in real-time) is the low quality and great incompatibility of transaction metadata churned out by payments systems. This complicates

automated interpretation of transactions metadata to recognize money laundering and terrorism financing.

Identification of clients and legal persons, as required by know-your-customer regulations, could become more efficient through the use of automated identification solutions such as fingerprint and iris scanning, block chain identity, etc.

Monitoring a financial institution's internal culture and behavior, and complying with customer protection processes, typically requires the analysis of qualitative information conveying the behavior of individuals, such as e-mails and spoken word. Automated interpretation of these sources would enable enormous leaps in efficiency, capacity, and speed of compliance.

Trading in financial markets requires participants to conduct a range of regulatory tasks such as margins calculation, choice of trading venue, choice of central counterparty, and assessing the impact of a transaction on their institution's exposures. Automating these tasks will ensure compliance and increase the speed and efficiency of trading.

Identifying new regulations applying to a financial institution, interpreting their implications and allocating the different compliance obligations to the responsible units across the organization is currently a labor-intensive and complex process, which could be enhanced through automated interpretation of regulations.

INDIA DEVELOPMENTS

Government Initiatives

The government of Prime Minister Narendra Modi has announced a slew of policies for the creation of a Digital India. Between the ambitious GST initiative and the commitment to improving the ease of Doing Business, the conditions are ripe for a surge in the regtech opportunity. Infact, India ranks among the top five countries in terms of digitalisation maturity as per Accenture's Platform Readiness Index, and is expected to be among the top countries with the opportunity to grow and scale up digital platforms by 2020/1. As India becomes increasingly digital, the Regtech industry will go from strength to strength. Enough indications are available of this trend as the announcements by the Government of India in the Union Budget 2017-18 suggests. Thus for example,

- The Government of India has allocated Rs 10,000 crore (US$ 1.5 billion) for BharatNet project under which it aims to provide high speed broadband to more than 150,000 gram panchayats by 2017-18. This will help lay the physical infrastructure for Regtech.
- Prime Minister of India, Mr Narendra Modi, has launched the Bharat Interface for Money (BHIM) app, an Aadhaar-based mobile payment application that will allow users to make digital payments without having to use a credit or debit card. The app has already reached the mark of 10 million downloads. The Government of India plans to revamp the United Payment Interface (UPI) and Unstructured Supplementary Service Data (USSD), to make it easier for consumers to transact digitally either with or without an Internet connection with the aim of strengthening its push towards making India a digital economy.
- Mr Ravi Shankar Prasad, Union Minister of Law & Justice and Information Technology, has launched a free Doordarshan DTH channel called DigiShala, which will help people understand the use of unified payments interface (UPI), USSD, aadhaar-enabled payments system, electronic wallets, debit and credit cards, thereby promoting various modes of digital payments.
- The Government of Telangana has signed an agreement with network solutions giant Cisco Systems Incorporation, to cooperate on a host of technology initiatives, including Smart Cities,

Internet of Things, cybersecurity, education digitisation of monuments. This shows how things are moving even at the state level.

- Government of India is planning to develop five incubation centres for IoT start-ups, as a part of Prime Minister Mr Narendra Modi's Digital India and Startup India campaign, with at least two centres to be set up in rural areas to develop solutions for smart agriculture. Some of this should lad to increasing competition in the Reg tech space.
- The Government of India has launched the Digital India program to provide several government services to the people using IT and to integrate the government departments and the people of India. The adoption of key technologies across sectors spurred by the 'Digital India Initiative' could help boost India's Gross Domestic Product (GDP) by US$ 550 billion to US$ 1 trillion by 2025@@.
- India and the US have agreed to jointly explore opportunities for collaboration on implementing India's ambitious Rs 1.13 trillion (US$ 16.58 billion) 'Digital India Initiative'. The two sides also agreed to hold the US-India Information and Communication Technology (ICT) Working Group in India later this year.

Investments/ Developments

Recent developments in the Indian IT landscape point to an upsurge in cloud acceptance even as other initiatives point to the explosion in data availability and usage.

- Google plans to set up its first data centre in India in the city of Mumbai by 2017, to improve its services to local customers wanting to host their applications on the internet, and to compete effectively with the likes of Amazon and Microsoft,
- Intel Corporation plans to invest in Digital India related solutions such as India stack, Unique Identification (UID), e-government 2.0 and other government initiatives, and scale up operations of its data centre group (DCG), as per Mr Prakash Mallya, Director DCG, Asia for Intel Corporation.
- Reliance Industries Ltd (RIL) plans to set up entrepreneurship hubs in key cities and towns, and a Rs 5,000 crore (US$ 748 million) fund, under the name of Jio Digital India Startup Fund, to invest in technology based startups.
- Nasscom Foundation, a non-profit organisation which is a part of Nasscom, has partnered with SAP India to establish 25 National Digital Literacy Mission (NDLM) centres in 12 cities across India, as a part of Government of India's Digital India initiative.

THE EVOLUTION OF REGTECH MARKET

The story of Regtech has to do with the how disclosure systems have evolved around the world over the years. The evolution of reporting systems in the capital markets is a case in point.

In the old days, when a company got listed on a stock exchange and had to file their results in compliance with the provisions of the listing agreement, they would turn to the typewriter and the postman. They would hammer out their announcements on a typewriter and send the typed sheets of paper to stock exchanges by post or have the documents delivered by hand. Even in this 21st century, that is the situation that continues to prevail in many countries. At best, the typewriter may have given way to the personal computer but the mode of delivery is still the same.

With the arrival of the facsimile machine or the fax as we call it, smaller documents would be faxed to the regulator while larger documents were still hand delivered. This ensured a slightly faster method of dissemination of time critical information.

Finally came the internet and with it the email which opened up a world of possibilities. Also, by now, personal computers too were everywhere computing power too had increased. Disclosures could now be made by e mail, and mails could be sent with documents as attachments. Delivery would be immediate

Even though the Securities Exchange Commission of the USA launched their electronic disclosure platform as far back as in 1984 even if only on a pilot basis, they woke up to its full range of possibilities only in the 1990s after the internet was born. And as internet technology evolved, regulators like the SEC woke up to a myriad of possibilities.

And then came XML. If the internet changed everything, the adoption of XML was truly transformational and even epoch making. Until now, recipients were receiving documents from which they still had to extract data. But with XML they would no longer have to be prisoners of document formats as they had been for far too long when what they really were after was the data or the information in the document. That is when began the move from the world of documents to a world of data. Also with improved technologies for encryption, data could travel more securely than ever before. It was suddenly possible for regulators to review filings and disseminate it to the market almost as soon as they received it.

That is how the focus shifted from document types to data standards and reporting formats. Data was finally getting all the attention that it should have been getting all along. Research into data standards accelerated, often in partnership with regulators. XBRL1, MDDL2, JSON3, all became part of the lexicon of regulators. Some standards would fall by the way side, as better, more robust standards emerged. The Regtech Industry found its mojo. The Regtech industry was all set to emerge from the shadow of the Fintech industry.

Much of the momentum for Regtech is also coming from the move towards data harmonization with greater attention being paid to data definition. It is not just the governments that are struggling, even financial institutions are handicapped by the lack an integrated data dictionary and taxonomy, such as required by the Basel Committee's "Principles for effective risk data aggregation and risk reporting". However, global regulatory frameworks and financial infrastructures such as wholesale payments systems also differ widely in the definitions they apply to financial concepts and data. The financial industry and regulators across the globe are now intensifying efforts to standardize data and data sharing vehicles (such as through the LEI/UPI/UTI) and appropriately defined regulatory concepts.

At the same time, with the move towards greater digitisation, regulators are waking up to the fact that they may be using outdated technology which is error prone thereby creating inefficiencies and leading to poor oversight.

The regtech market is still in its infancy, with no dominant player. Success in Regtech is predicated upon collaboration between unlikely partners: regulators and regulatory experts, technology and software developers, and entrepreneurs willing to invest. A coordinated effort or platform bringing together experts would enhance the entire community. Regtech development is especially reliant on knowledge sharing between regulators, regtech ventures and financial institutions.

We have a history of high

client retention and derive a significant proportion of our revenues from repeat business (defined as repeat business generated in the preceding Financial Year) built on our successful execution of prior engagements. In order to improve client retention, we carry out regular surveys, which is important for us to ensure a high level of client satisfaction through continuous feedback.

Our Growth Strategy

We strive to change the way businesses collect, manage, report and analyze critical business data.
Key elements of our growth strategy include:

Pursue New Customers.

Our primary growth strategy is to sell the iFile platform to regulators making their first foray into digital reporting. On the filing side, our first solution was focused on regulatory reporting and enabled customers to automate and improve their regulatory filing process. We continue to attract regulators whose interest in our compliance reporting solutions allows us an opportunity to leverage the brand equity so gained to attract new customers. In 2016, we launched our Carbon platform, under which we have expanded our offerings to four geographies. In 2017, we entered the GST space and have been successful in acquiring an initial set of marquee customers. The European Securities Markets Authority is bringing in an XBRL based reporting mandate for all European companies in 2020. Accordingly, we plan to increase our sales presence in Europe.

We have customers in multiple end markets, and we intend to pursue new customers in existing markets, and also to seek attractive new markets.

Generate Growth from Existing Customers

The growth drivers for our solution are similar in other parts of the world, including the need to reduce errors and risk, improve efficiency and respond to increasing regulatory requirements. In India, we have developed irisgst which helps our existing corporate clients for our XBRL solutions fulfill the filing requirements under GST Regime. Existing clients in the regulatory space, such as Reserve Bank of India and MCI Saudi Arabia have given us additional work related to enhancements or new reporting mandates.

Extend Our Suite of Solutions.

We intend to introduce new solutions to continue to meet growing demand for the creation, presentation and analysis of critical business data. Our close and trusted relationships with our current customers are a source of new use cases, features and solutions for our solution roadmap. We have a disciplined process for tracking, developing and releasing new solutions that are designed to have immediate, broad applicability, a strong value proposition and a high return on investment for both our Company and our customers. Our solution strategy and advance planning groups assess customer needs and conduct industry-based research, market and domain analysis and prototype development. This process involves our sales and product marketing, customer success, consulting, research and development, finance and senior management teams.

Develop New Data Solutions.

With our depth of experience working with a range of business and financial data across regulators as well as enterprises in several countries around the world, we see opportunities in data driven analytics solutions for both the segments.

HUMAN RESOURCE

We believe that our employees are key contributors to our business success. We focus on attracting and retaining best possible talent. Our Company looks for specific skill-sets, interests and background that would be an asset for its kind of business.

As on March 31, 2017 our Company has 298 employees, Our manpower is a prudent mix of the experienced and youth which gives us the dual advantage of stability and growth. Our work processes and skilled employees and resources together with our dedicated management team have enabled us to succesfully implement our growth plans.

We do not hire based on gender, we hire based on suitability for the task on hand. By taking this approach, we have had years when more than half of our staff have been women, today it is about 30%. In general, our percentage of women employees has varied between 25 % to 50 %. In fact, at one point in time, a large proportion of the leadership positions at IRIS were occupied by women.

We provide flexibility to our employees by not having a clock punching culture. It does not matter whether people come into work or not so long as the work gets done.

Given the enormous flexibility that we offer all employees irrespective of gender, people can work at their own pace and in their own space, subject of course to demands placed by a customer.

We have a very young team, the average age is under 30. We are lite on rigid policies, and instead have consciously tried to create an informal and open work culture, and an environment where people feel comfortable approaching anyone in the firm, the founders included. We work with a belief that employees deliver more by being engaged than by being forced to adhere to a rigid discipline. Every employee is a valuable stake holder in the IRIS journey. Our team of 298 people includes finance and accounting domain specialists, data scientists, XBRL experts, software engineering and product and project management resources, sales and marketing, customer support as well as the support functions of finance, HR and admin.

MARKETING STRATEGY

The effectiveness of the marketing and sales network is critical to the success of our Company. With the change in business strategy, our sales and marketing strategy will also be aligned towards SaaS based client acquisition process. At the same time, high value sales in Collect business will continue to require high touch point with regulatory clients.

Our sales and marketing efforts will be directed at:

- Appointing experienced professionals in key markets to accelerate the sales outreach of our suite of products and partnerships.
- Alliance development through partners such as software companies, system integrators and consulting firms (including the Big 4) to step up our outreach across geographies.
- A strong digital marketing push. Especially in the Create division, we see digital marketing as a key component in rapid customer acquisition.

For large regulatory clients, direct sales outreach and meetings will continue to form a critical part of the customer acquisition strategy. For instance, we have been a regular exhibitor at events of the International Organization of Securities Commissions (IOSCO) starting from the day an IOSCO

event was held in Mumbai in 2007. Being present at such events helps build a significant brand recall among the securities markets regulators and also among the stock exchanges who participate at these events.

Neither we nor any other person connected with the Issue have verified this information. The data may have been re-classified by us for the purposes of presentation. OVERVIEW OF REGTECH INDUSTRY

"Regtech" is "the use of new technologies to solve regulatory and compliance requirements more effectively and efficiently." Recent innovations in technology indicate that we are only at the early stages of a regtech market, with more development of new solutions in the near future.

The ambitious regulatory reform agenda implemented after the financial crisis has closed loopholes in the financial regulatory framework, but has also significantly increased compliance costs. Successful regtech companies would then be those that could help reduce compliance burden without yielding on the effectiveness of compliance and oversight regimes.

Much of the literature on Regtech focuses on the regulated ignoring the opportunities at the Regulator's end which is really where the story begins. It is the desire of a regulator to leverage the emerging digital world by re architecting the disclosure framework that is the starting for any analysis of the Regtech opportunity.

(Source: Regtech in Financial Services - www.iif.com)

The following issues in compliance and regulatory reporting could benefit from the development of regtech solutions:

Risk data aggregation as required for capital and liquidity reporting, for RRP and for stress testing, implies the gathering and aggregation of high quality structured data from across the financial group. It is complicated by definitional issues and the use of incompatible and outdated IT systems.

Modelling, scenario analysis and forecasting as required for stress testing and risk management is increasingly complex and demanding in terms of computing power and labor and intellectual capacity, due to the vast array of risks, scenarios, variables and methodological diversity that needs to be included.

A bottleneck in **monitoring payments transactions** (particularly in real-time) is the low quality and great incompatibility of transaction metadata churned out by payments systems. This complicates automated interpretation of transactions metadata to recognize money laundering and terrorism financing.

Identification of clients and legal persons, as required by know-your-customer regulations, could become more efficient through the use of automated identification solutions such as fingerprint and iris scanning, block chain identity, etc.

Monitoring a financial institution's internal culture and behavior, and complying with customer protection processes, typically requires the analysis of qualitative information conveying the behavior of individuals, such as e-mails and spoken word. Automated interpretation of these sources would enable enormous leaps in efficiency, capacity, and speed of compliance.

Trading in financial markets requires participants to conduct a range of regulatory tasks such as margins calculation, choice of trading venue, choice of central counterparty, and assessing the impact of a transaction on their institution's exposures. Automating these tasks will ensure compliance and increase the speed and efficiency of trading.

Identifying new regulations applying to a financial institution, interpreting their implications and allocating the different compliance obligations to the responsible units across the organization is currently a labor-intensive and complex process, which could be enhanced through automated interpretation of regulations.

INDIA DEVELOPMENTS

Government Initiatives

The government of Prime Minister Narendra Modi has announced a slew of policies for the creation of a Digital India. Between the ambitious GST initiative and the commitment to improving the ease of Doing Business, the conditions are ripe for a surge in the regtech opportunity. Infact, India ranks among the top five countries in terms of digitalisation maturity as per Accenture's Platform Readiness Index, and is expected to be among the top countries with the opportunity to grow and scale up digital platforms by 2020/1. As India becomes increasingly digital, the Regtech industry will go from strength to strength. Enough indications are available of this trend as the announcements by the Government of India in the Union Budget 2017-18 suggests. Thus for example,

- The Government of India has allocated Rs 10,000 crore (US$ 1.5 billion) for BharatNet project under which it aims to provide high speed broadband to more than 150,000 gram panchayats by 2017-18. This will help lay the physical infrastructure for Regtech.
- Prime Minister of India, Mr Narendra Modi, has launched the Bharat Interface for Money (BHIM) app, an Aadhaar-based mobile payment application that will allow users to make digital payments without having to use a credit or debit card. The app has already reached the mark of 10 million downloads. The Government of India plans to revamp the United Payment Interface (UPI) and Unstructured Supplementary Service Data (USSD), to make it easier for consumers to transact digitally either with or without an Internet connection with the aim of strengthening its push towards making India a digital economy.
- Mr Ravi Shankar Prasad, Union Minister of Law & Justice and Information Technology, has launched a free Doordarshan DTH channel called DigiShala, which will help people understand the use of unified payments interface (UPI), USSD, aadhaar-enabled payments system, electronic wallets, debit and credit cards, thereby promoting various modes of digital payments.
- The Government of Telangana has signed an agreement with network solutions giant Cisco Systems Incorporation, to cooperate on a host of technology initiatives, including Smart Cities, Internet of Things, cybersecurity, education digitisation of monuments. This shows how things are moving even at the state level.
- Government of India is planning to develop five incubation centres for IoT start-ups, as a part of Prime Minister Mr Narendra Modi's Digital India and Startup India campaign, with at least two centres to be set up in rural areas to develop solutions for smart agriculture.Some of this should lad to increasing competition in the Reg tech space.
- The Government of India has launched the Digital India program to provide several government services to the people using IT and to integrate the government departments and the people of India. The adoption of key technologies across sectors spurred by the 'Digital India Initiative' could

help boost India's Gross Domestic Product (GDP) by US$ 550 billion to US$ 1 trillion by 2025@@.

- India and the US have agreed to jointly explore opportunities for collaboration on implementing India's ambitious Rs 1.13 trillion (US$ 16.58 billion) 'Digital India Initiative'. The two sides also agreed to hold the US-India Information and Communication Technology (ICT) Working Group in India later this year.

Investments/ Developments

Recent developments in the Indian IT landscape point to an upsurge in cloud acceptance even as other initiatives point to the explosion in data availability and usage.

- Google plans to set up its first data centre in India in the city of Mumbai by 2017, to improve its services to local customers wanting to host their applications on the internet, and to compete effectively with the likes of Amazon and Microsoft,
- Intel Corporation plans to invest in Digital India related solutions such as India stack, Unique Identification (UID), e-government 2.0 and other government initiatives, and scale up operations of its data centre group (DCG), as per Mr Prakash Mallya, Director DCG, Asia for Intel Corporation.
- Reliance Industries Ltd (RIL) plans to set up entrepreneurship hubs in key cities and towns, and a Rs 5,000 crore (US$ 748 million) fund, under the name of Jio Digital India Startup Fund, to invest in technology based startups.
- Nasscom Foundation, a non-profit organisation which is a part of Nasscom, has partnered with SAP India to establish 25 National Digital Literacy Mission (NDLM) centres in 12 cities across India, as a part of Government of India's Digital India initiative.

THE EVOLUTION OF REGTECH MARKET

The story of Regtech has to do with the how disclosure systems have evolved around the world over the years. The evolution of reporting systems in the capital markets is a case in point.

In the old days, when a company got listed on a stock exchange and had to file their results in compliance with the provisions of the listing agreement, they would turn to the typewriter and the postman. They would hammer out their announcements on a typewriter and send the typed sheets of paper to stock exchanges by post or have the documents delivered by hand. Even in this 21st century, that is the situation that continues to prevail in many countries. At best, the typewriter may have given way to the personal computer but the mode of delivery is still the same.

With the arrival of the facsimile machine or the fax as we call it, smaller documents would be faxed to the regulator while larger documents were still hand delivered. This ensured a slightly faster method of dissemination of time critical information.

Finally came the internet and with it the email which opened up a world of possibilities. Also, by now, personal computers too were everywhere computing power too had increased. Disclosures could now be made by e mail, and mails could be sent with documents as attachments. Delivery would be immediate

Even though the Securities Exchange Commission of the USA launched their electronic disclosure platform as far back as in 1984 even if only on a pilot basis, they woke up to its full range of possibilities only in the 1990s after the internet was born. And as internet technology evolved, regulators like the SEC woke up to a myriad of possibilities.

And then came XML. If the internet changed everything, the adoption of XML was truly transformational and even epoch making. Until now, recipients were receiving documents from which they still had to extract data. But with XML they would no longer have to be prisoners of document formats as they had been for far too long when what they really were after was the data or the

information in the document. That is when began the move from the world of documents to a world of data. Also with improved technologies for encryption, data could travel more securely than ever before. It was suddenly possible for regulators to review filings and disseminate it to the market almost as soon as they received it.

That is how the focus shifted from document types to data standards and reporting formats. Data was finally getting all the attention that it should have been getting all along. Research into data standards accelerated, often in partnership with regulators. XBRL4, MDDL5, JSON6, all became part of the lexicon of regulators. Some standards would fall by the way side, as better, more robust standards emerged. The Regtech Industry found its mojo. The Regtech industry was all set to emerge from the shadow of the Fintech industry.

Much of the momentum for Regtech is also coming from the move towards data harmonization with greater attention being paid to data definition. It is not just the governments that are struggling, even financial institutions are handicapped by the lack an integrated data dictionary and taxonomy, such as required by the Basel Committee's "Principles for effective risk data aggregation and risk reporting". However, global regulatory frameworks and financial infrastructures such as wholesale payments systems also differ widely in the definitions they apply to financial concepts and data. The financial industry and regulators across the globe are now intensifying efforts to standardize data and data sharing vehicles (such as through the LEI/UPI/UTI) and appropriately defined regulatory concepts.

At the same time, with the move towards greater digitisation, regulators are waking up to the fact that they may be using outdated technology which is error prone thereby creating inefficiencies and leading to poor oversight.

The regtech market is still in its infancy, with no dominant player. Success in Regtech is predicated upon collaboration between unlikely partners: regulators and regulatory experts, technology and software developers, and entrepreneurs willing to invest. A coordinated effort or platform bringing together experts would enhance the entire community. Regtech development is especially reliant on knowledge sharing between regulators, regtech ventures and financial institutions.

Our Growth Strategy

We strive to change the way businesses collect, manage, report and analyze critical business data. Key elements of our growth strategy include:

Pursue New Customers.

Our primary growth strategy is to sell the iFile platform to regulators making their first foray into digital reporting. On the filing side, our first solution was focused on regulatory reporting and enabled customers to automate and improve their regulatory filing process. We continue to attract regulators whose interest in our compliance reporting solutions allows us an opportunity to leverage the brand equity so gained to attract new customers. In 2016, we launched our Carbon platform, under which we have expanded our offerings to four geographies. In 2017, we entered the GST space and have been successful in acquiring an initial set of marquee customers. The European Securities Markets Authority is bringing in an XBRL based reporting mandate for all European companies in 2020. Accordingly, we plan to increase our sales presence in Europe.

We have customers in multiple end markets, and we intend to pursue new customers in existing markets, and also to seek attractive new markets.

Generate Growth from Existing Customers

The growth drivers for our solution are similar in other parts of the world, including the need to reduce errors and risk, improve efficiency and respond to increasing regulatory requirements. In India, we have developed irisgst which helps our existing corporate clients for our XBRL solutions fulfill the filing requirements under GST Regime. Existing clients in the regulatory space, such as Reserve Bank of India and MCI Saudi Arabia have given us additional work related to enhancements or new reporting mandates.

Extend Our Suite of Solutions.

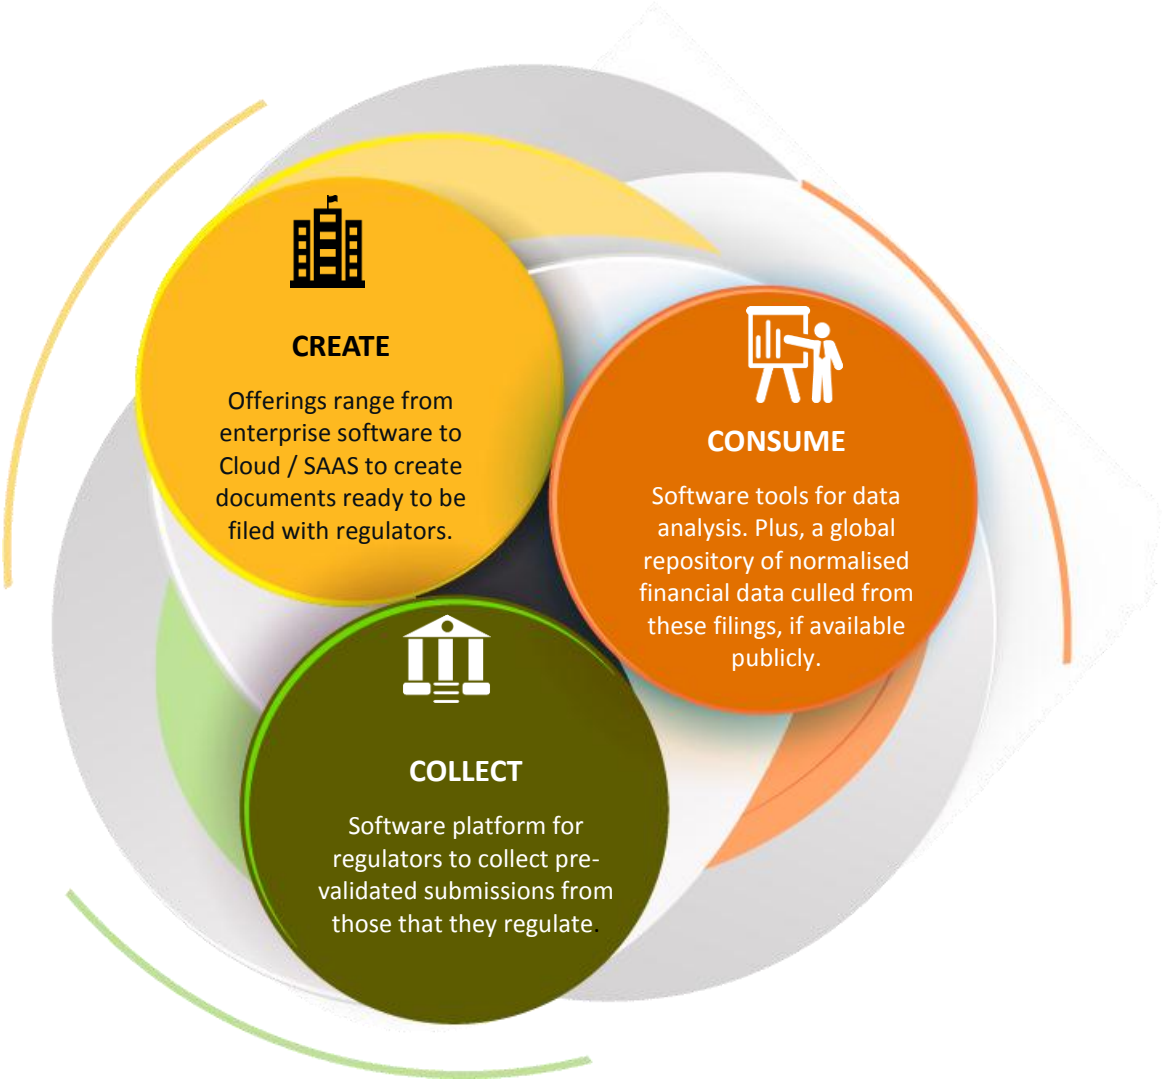

We intend to introduce new solutions to continue to meet growing demand for the creation, presentation and analysis of critical business data. Our close and trusted relationships with our current customers are a source of new use cases, features and solutions for our solution roadmap. We have a disciplined process for tracking, developing and releasing new solutions that are designed to have immediate, broad applicability, a strong value proposition and a high return on investment for both our Company and our customers. Our solution strategy and advance planning groups assess customer needs and conduct industry-based research, market and domain analysis and prototype development. This process involves our sales and product marketing, customer success, consulting, research and development, finance and senior management teams.

Develop New Data Solutions.

With our depth of experience working with a range of business and financial data across regulators as well as enterprises in several countries around the world, we see opportunities in data driven analytics solutions for both the segments.

PRODUCTS

Our products meet the needs of regulators to collect and of the regulated to create data for submission to regulators. It also meets the paramount objective of analysis of data so created and submitted.

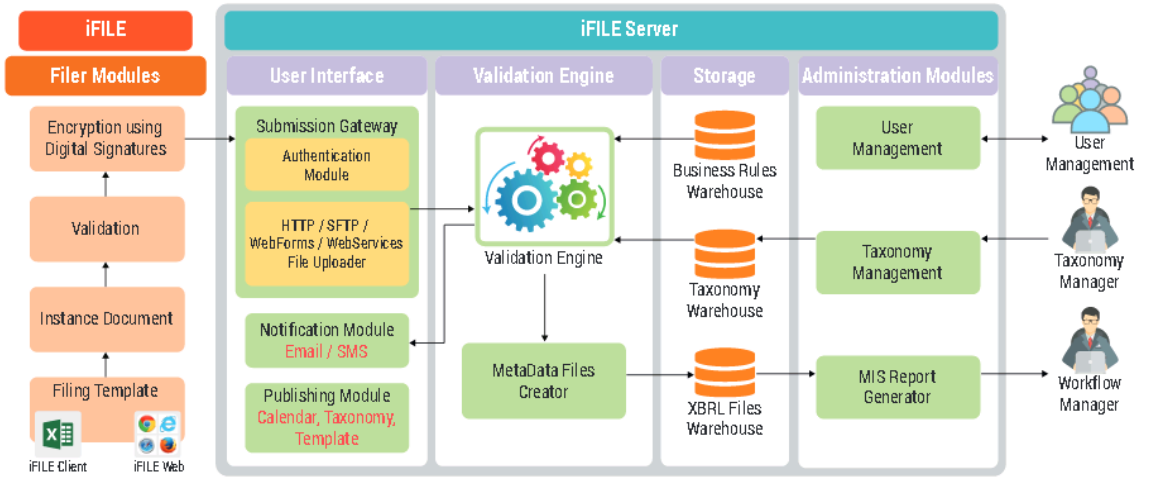

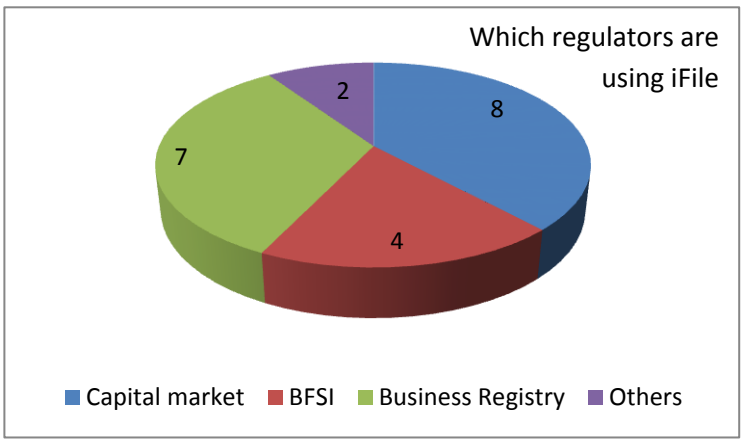

COLLECT

iFile is the flagship product of this segment. It is a software platform which helps regulators with the collection of pre validated data. We count among our clients, BFSI regulators, capital market regulators and business registries.

IRIS iFILE – An Electronic Filing Solution

IRIS iFILE is an end to end electronic filing framework comprising several modular components; file allows easy management of all the stages of the disclosure management lifecycle. The framework can be customized for various reporting environment and uses the XBRL information standard and other similar formats to enable data collection and its validation. The offering is divided into Filer and regulator modules. The filer modules allow filers to create documents for submission to a regulator. The regulator modules consist of several applications that allow the regulator to accept, validate and store instance documents. It also allows the regulator to manage and publish the taxonomy, filings, filing calendar among others.

IRIS iFILE has been used by a cross section of regulators including those with oversight of Capital Markets, Banking and Stock Exchanges. Over the years, iFile has found takers in over 20 regulators in some 15 countries. Among them are Bombay Stock Exchange & National Stock Exchange, SEBI, the Emirates Securities and Commodities Authority (UAE), the Government of Macedonia, the Accounting and Corporate Regulatory Authority (Singapore), The Tadawul Stock Exchange (Kingdom of Saudi Arabia), Department of Business Development (Thailand), Qatar Financial Centre Regulatory Authority, Saudi Organization for Certified Public Accountants (SOCPA) and Companies Division, Mauritius.

Taxonomy consulting

The first activity of an regulator seeking to move to an XBRL based digital reporting framework is the development of a taxonomy. IRIS's Taxonomy Design and Management methodology provides regulators with a structured approach to create and manage taxonomies. This methodology has been successfully leveraged to develop and deploy taxonomies in all the countries where iFile has been deployed and more. IRIS' experienced, interdisciplinary team of consultants has created a number of key reporting taxonomies across different reporting domains. Our XBRL taxonomy experts have worked on and have an understanding of prudential reporting for banking and insurance, business registrar requirements, IFRS taxonomies, US-GAAP based reporting, Data Point Modeling based taxonomies, Islamic reporting requirements and non-financial taxonomies like Global Reporting Initiative and Corporate Actions. Our credentials in this area are well recognized and our consultants today help to drive the XBRL standard itself as part of the global XBRL community.

COMPETITION

Our biggest hurdle has not been competition as much as lack of awareness on the part of a potential customer. Knowledge about XBRL is still not as common. In countries where they have taken a step towards a digital reporting framework, the competition we are often up against are Core Filing of the UK, Invoke of France and Fujitsu of Japan.

CREATE

A logical extension of the "Collect" segment of our business is what we call "Create" which offers software to help the regulated entities create data for submission to regulators. Clients include banks, mutual funds and corporates. Differences between regulatory environments across countries and amongst regulators within a country necessitate differentiated products.

IRIS CARBON™

IRIS CARBON is a cloud-based, collaborative filing platform that addresses reporting needs of an enterprise. IRIS CARBON™ is built with XBRL experience – over 7 years with the US SEC and 10 years globally – and prior experience of building enterprise and industrial grade XBRL products. IRIS CARBON™ simplifies reporting, while ensuring increased productivity and efficient collaboration across the organization.

End User:
IRIS CARBON is used across various corporates for filing of various reports with regulators. It is presently being used by businesses in USA, England, Ireland and Italy.

IRIS iDEAL

IRIS iDEAL is a comprehensive XBRL reporting solution and acts as a bridge between the organization's internal data systems and the regulator's filing platform to enable easy conversion of data from existing systems into an XBRL format for submission to regulators. Reporting entities which have high frequency and high volume of data reporting need automated reporting solutions. With just a one-time mapping of internal data to the required taxonomies, XBRL document creation can be automatically scheduled at desired frequencies through IRIS iDEAL. IRIS partners with system integrators (SI) to create a Central Data Repository (CDR), which acts as the intermediate data layer between an institution's source systems and IRIS iDEAL.

End User
iDEAL is being used by a large number banks and mutual funds in India and Mauritius, it is also finding acceptance in South East Asia and Africa.

iDeal has also provided the foundation for other products to enable filing to regulators as far removed as the tax authorities in Turkey and the Financial Intelligence Unit in India.

Irisgst
irisgst is an integrated cloud based solution aimed at assisting large and small enterprises with their GST filings. Combining both the ASP (Application Service Provider) and GSP (GST Suvidha Provider) modules, irisgst provides a seamless experience to end clients, and the vision of the platform includes an overlay of powerful analytics.

End User
The GST mandate encompasses all enterprises in India with a turnover of above Rs 20 lakhs per annum. While large companies with multiple tax payer entities within their legal entity highly value an automated process and centralized GST filing platform, SMEs look for an easy to use tool at the right price point. Irisgst targets both in a phased fashion.

COMPETITION

Competiton for providing tools to create ready to file documents is intense. In India for example, there are atleast 33 other firms seeking to provide software for GST filing, while there 25 other software vendors with tools for MCA filing. A similar situation obtains in most other countries where the market looks equally crowded with local players.

CONSUME

The Data Consumption Platform (DCP), our Data-as-a-Service or DaaS offering, is a repository of structured data culled from XBRL filings submitted by companies to securities markets regulators and company registries. The data has been normalized to facilitate meaningful comparison of corporate performance across markets, industries and geographies. We have leveraged our experience of working with structured data to build several applications for efficient consumption, analysis and dissemination of information. Some of these include:

- ✓ iConnect – an MS Excel plugin for easy analysis
- ✓ Cleandata.com – a web portal for data and analysis and
- ✓ Writeclick – a story engine that creates automated content .

While the the repository and the tools associated with it are under development, the company's financial portal, myiris.com is a well known one.

HUMAN RESOURCE

We believe that our employees are key contributors to our business success. We focus on attracting and retaining best possible talent. Our Company looks for specific skill-sets, interests and background that would be an asset for its kind of business.

As on March 31, 2017 our Company has 298 employees, Our manpower is a prudent mix of the experienced and youth which gives us the dual advantage of stability and growth. Our work processes and skilled employees and resources together with our dedicated management team have enabled us to succesfully implement our growth plans.

We do not hire based on gender, we hire based on suitability for the task on hand. By taking this approach, we have had years when more than half of our staff has been women, today it is about 30%. In general, our percentage of women employees has varied between 25 % to 50 %. In fact, at one point in time, a large proportion of the leadership positions at IRIS were occupied by women.

We provide flexibility to our employees by not having a clock punching culture. It does not matter whether people come into work or not so long as the work gets done.

Given the enormous flexibility that we offer all employees irrespective of gender, people can work at their own pace and in their own space, subject of course to demands placed by a customer.

We have a very young team, the average age is under 30. We are lite on rigid policies, and instead have consciously tried to create an informal and open work culture, and an environment where people feel comfortable approaching anyone in the firm, the founders included. We work with a belief that employees deliver more by being engaged than by being forced to adhere to a rigid discipline. Every employee is a valuable stake holder in the IRIS journey. Our team of 298 people includes finance and accounting domain specialists, data scientists, XBRL experts, software engineering and product and project management resources, sales and marketing, customer support as well as the support functions of finance, HR and admin.

MARKETING STRATEGY

The effectiveness of the marketing and sales network is critical to the success of our Company. With the change in business strategy, our sales and marketing strategy will also be aligned towards SaaS based client acquisition process. At the same time, high value sales in Collect business will continue to require high touch point with regulatory clients.

Our sales and marketing efforts will be directed at:

- Appointing experienced professionals in key markets to accelerate the sales outreach of our suite of products and partnerships.
- Alliance development through partners such as software companies, system integrators and consulting firms (including the Big 4) to step up our outreach across geographies.
- A strong digital marketing push. Especially in the Create division, we see digital marketing as a key component in rapid customer acquisition.
- For large regulatory clients, direct sales outreach and meetings will continue to form a critical part of the customer acquisition strategy. For instance, we have been a regular exhibitor at events of the International Organization of Securities Commissions (IOSCO) starting from the day an IOSCO event was held in Mumbai in 2007. Being present at such events helps build a significant brand recall among the securities markets regulators and also among the stock exchanges who participate at these events.

INTELLECTUAL PROPERTY LAW

The Trade Marks Act, 1999 ("Trademarks Act")

The Trade Marks Act governs the law pertaining to trade marks in India. A trade mark is essentially any mark capable of being represented graphically and distinguishing goods or services of one person from those of others and includes a device, brand, heading, label, ticket, name, signature, word, letter, numeral, shape of goods, packaging or combination of colours or combination thereof. In India, trademarks enjoy protection under both statutory and common law. Indian trademarks law permits the registration of trademarks for goods and services. Certification trademarks and collective marks can also be registered under the Trademarks Act. The Registrar of Trademarks is the authority responsible for registration of the trademarks, settling opposition proceedings and rectification of the register of trademarks.

Once a mark is registered, it is valid in India only, for a period of 10 years and can be renewed from time to time in perpetuity. Registration of a trademark grants the owner a right to exclusively use the trademark as a mark of goods and services and prevents the fraudulent use of deceptively similar marks by any third party.

The Copyright Act, 1957 ("Copyright Act")

The Copyright Act protects original literary, dramatic, musical and artistic works, cinematographic films and sound recordings from unauthorized use of such works. Unlike the case with patents, copyright protects the expressions and not the ideas. There is no copyright in an idea. The object of copyright law is to encourage authors, artists and composers to create original works by rewarding them with exclusive right for a fixed period to reproduce the works for commercial exploitation. Copyrights subsist in following class of works: a) Original literary, musical, dramatic and artistic works b) Cinematograph films c) Sound recordings. Under the copyright law the creator of the

original expression in a work is its author who is vested with a set of exclusive rights with respect to the use and exploitation of the work. The author is also the owner of the copyright, unless there is a written agreement by which the author assigns the copyright to another person or entity, such as a publisher, where work is done under a 'work for hire' agreement, the copyright vests with the hirer, i.e., the person providing the work. The owner of copyright in a work can assign or license his copyright to any person, such as publisher, under a written agreement. Copyright subsists in a work since the time it comes into being. Therefore, registration of copyright neither creates any rights nor precludes enforcement of the existing ones. However, owing to its evidentiary value, a registered copyright is easier to establish in the court of law. The term of copyright varies across different types of works. Therefore, except as specifically provided in the Copyright Act, a copyright shall subsist in any literary, dramatic, musical or artistic work (other than a photograph) published within the lifetime of the author until 60 (sixty) years from the beginning of the calendar year next following the year in which the author dies.

TAX RELATED LEGISLATIONS

Goods and Service Tax

Goods and Services Tax (GST) is an indirect tax which was introduced in India on 1 July 2017 and was applicable throughout India which replaced multiple cascading taxes levied by the central and state governments such as central excise duty, services tax, additional customs duty, surcharges, state-level value added tax and Octroi, other levies which were applicable on inter-state transportation of goods. It was introduced as The Constitution (One Hundred and First Amendment) Act 2017, following the passage of Constitution 122nd Amendment Bill. The GST is governed by a GST Council and its Chairman is the Finance Minister of India**.** GST is levied on all transactions such as sale, transfer, purchase, barter, lease, or import of goods and/or services. India adopted a dual GST model, meaning that taxation is administered by both the Central and State Governments. Transactions made within a single state are levied with Central GST (CGST) by the Central Government and State GST (SGST) by the State governments. For inter-state transactions and imported goods or services, an Integrated GST (IGST) is levied by the Central Government. GST is a consumption-based tax, therefore, taxes are paid to the state where the goods or services are consumed not the state in which they were produced.

Central Goods and Service Tax 2017("CGST Act")

CGST Act provides for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected therewith or incidental thereto.

Value Added tax is a system of multi-point levies on each of the purchases in the supply chain with the facility of set-off input tax on sales whereby tax is paid at the stage of purchase of goods by a trader and on purchase of raw materials by a manufacturer. VAT is based on the value addition of goods, and the related VAT liability of the dealer is calculated by deducting input tax credit for tax collected on the sales during a particular period. VAT is a consumption tax applicable to all commercial activities involving the production and distribution of goods and the provisions of services, and each State that has introduced VAT has its own VAT Act under which persons liable to pay VAT must register and obtain a registration number from the Sales Tax Officer of the respective State.

As the registered office of the Company is in Maharashtra, the following are applicable to the Company:

OTHER REGULATIONS

Transfer of Property Act, 1882 ("T.P. Act")

The transfer of property, including immovable property, between living persons, as opposed to the transfer property by operation of law, is governed by the Transfer of Property Act, 1882. The T.P. Act establishes the general principles relating to the transfer of property, including among other things, identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property. Transfer of property is subject to stamping and

registration under the specific statutes enacted for the purposes which have been dealt with hereinafter. The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- Sale: The transfer of ownership in property for a price, paid or promised to be paid.
- Mortgage: The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognises several forms of mortgages over a property.
- Charges: Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- Leases: The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- Leave and License: The transfer of a right to do something upon immovable property without creating interest in the property.

Further, it may be noted that with regards to the transfer of any interest in a property, the transferor transfers such interest, including any incidents, in the property which he is capable of passing and under the law, he cannot transfer a better title than he himself possesses.

The Registration Act, 1908 ("Registration Act")

The Registration Act, 1908 was passed to consolidate the enactments relating to the registration of documents. The main purpose for which the Registration Act was designed was to ensure information about all deals concerning land so that correct land records could be maintained. The Registration Act is used for proper recording of transactions relating to other immovable property also. The Registration Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

All others instruments are required to be stamped, as per the rates prescribed by the respective State Governments. Stamp duty is required to be paid on all the documents that are registered and as stated above the percentage of stamp duty payable varies from one State to another. Certain State in India have enacted their own legislation in relation to stamp duty while the other State have adopted and amended the Stamp Act, as per the rates applicable in the State. On such instruments stamp duty is payable at the rates specified in Schedule I of the Stamp Act. Instruments chargeable to duty under the Stamp Act which are not duly stamped are incapable of being admitted in court as evidence of the transaction contained therein. The Stamp Act also provides for impounding of instruments which are not sufficiently stamped or not stamped at all. Unstamped and deficiently stamped instruments can be impounded by the authority and validated by payment of penalty. The amount of penalty payable on such instruments may vary from State to State.

The Indian Contract Act, 1872 ("Contract Act")

The Indian Contract Act codifies the way in which a contract may be entered into, executed, implementation of the provisions of a contract and effects of breach of a contract. A person is free to contract on any terms he chooses. The Contract Act consists of limiting factors subject to which contract may be entered into, executed and the breach enforced. It provides a framework of rules and regulations that govern formation and performance of contract. The contracting parties themselves decide the rights and duties of parties and terms of agreement.

The Specific Relief Act, 1963 ("Specific Relief Act")

The Specific Relief Act is complimentary to the provisions of the Contract Act and the Transfer of Property Act, as the Act applies both to movable property and immovable property. The Specific Relief Act applies in cases where the Court can order specific performance of a contract. Specific relief can be granted only for purpose of enforcing individual civil rights and not for the mere purpose of enforcing a civil law. 'Specific performance' means Court will order the party to perform his part of agreement, instead of imposing on him any monetary liability to pay damages to other party.

The Competition Act also provides that the Competition Commission has the jurisdiction to inquire into and pass orders in relation to an anti- competitive agreement, abuse of dominant position or a combination, which even though entered into, arising or taking place outside India or signed between one or more non-Indian parties, but causes an appreciable adverse effect in the relevant market in India.

2. SIGNIFICANT ACCOUNTING POLICIES

a. Basis of preparation of Financial Statements

These financial statements are prepared and presented in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('Act').

The accounts have been prepared on historical cost basis using the accrual basis of accounting. The preparation of financial statements as per this policy requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) as on the date of the financial statements and the reported income and expenses during the reporting period. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ from these estimates.

b. Principles of consolidation

The financial statements of the subsidiary companies used in the consolidation are drawn up to the same reporting date as of the Company.

The consolidated financial statements have been prepared on the following basis:

i) The financial statements of the Company and its subsidiary companies have been combined on a line-by-line basis by adding together like items of assets, liabilities, income and expenses. Inter-company balances and transactions and unrealised profits or losses have been fully eliminated.

ii) The excess of the cost to the parent of its investments in a subsidiary over the parent's portion of equity at the date, on which investment in the subsidiary is made, is recognised as 'Goodwill (on consolidation)'. When the cost to the parent of its investment in a subsidiary is less than the parent's portion of equity of the subsidiary at the date on which investment in the subsidiary is made, the difference is treated as 'Capital Reserve (on consolidation)' in the consolidated financial statements. However, since all investments in subsidiary companies were made at the time of its formation, there is no Goodwill or Capital Reserve in the present consolidated financial statements.

iii) Minority interest in the net assets of consolidated subsidiaries consists of the amount of equity attributable to the minority shareholders at the dates on which investments in the subsidiary companies are made and further movements in their share in the equity, subsequent to the dates of investments. Since minority interest is negative in this consolidation, the same is adjusted against reserves and surplus.

c. Translation to Indian Rupees

The functional currency of the Parent Company is Indian Rupee.

The functional currencies of the subsidiaries are their respective local currencies. Their accounts are converted from their local currency to Indian Rupees in the following manner:

All income and expense items are translated at the annual average rate of exchange applicable for the year. All monetary assets and liabilities are translated at the closing rate of exchanges on the Balance Sheet date. For all non-monetary assets and liabilities opening balances are brought forward from the last year Indian rupee value and addition, deletions and adjustments thereto during the financial year have been made using the average annual rate of exchange applicable for the year. The equity share capital is stated at the exchange rate at the date of investment. The exchange difference arising out of the yearend translation is debited or credited to Foreign Currency Translation Reserve account and is being classified under Reserves and Surplus Account.

d. Revenue Recognition

Revenue is recognized when no significant uncertainty exists as to either the measurement or ultimate realization of the same.

Revenue from Operations

i. Revenue from contracts including hosting and maintenance contracts , development or customization of software, advertisement and data conversion services is measured using the proportionate completion method and are recognised, provided at the time of performance it is not unreasonable to expect ultimate collection.

ii. Revenue from sale of software/ software licenses which do not involve any customization are recognized upon delivery of the software to the clients and Renewal subscription income is recognized as revenue as & when the subscriptions are received.

Other Income

i. Interest on Bank deposits is recognized on accrual basis.

ii. Rental income is recorded on accrual basis.

iii. Any other income is recognized on accrual basis, when no significant uncertainty as to measurability or collectability exists.

e. Fixed Assets

Tangible Fixed Assets are stated at the cost of acquisition less accumulated depreciation. Cost includes incidental expenses incurred during the acquisition/ installation, and excludes taxes and duties for which credit has been claimed.

Intangible assets are recorded at the consideration paid for acquisition of such asset and are carried at cost less accumulated amortisation and impairment.

Capitalisation of Expenses incurred for development of software:
Costs incurred in the development of proprietary software products have been classified and grouped under the heads "Software Developed In-House" & "Intangible Assets under Development" under Fixed Assets as per the recognition criteria laid down under AS 26 .

f. **Depreciation & Amortization**

For the Financial years 2012-13 and 2013-14, the depreciation was provided at rates specified and in the manner prescribed by Schedule XIV to the Companies Act, 1956.

For the Financial years 2014-15, 2015-16 and 2016-17, tangible fixed assets are depreciated on straight line basis over the useful life as specified in Schedule II of Companies Act, 2013.

Individual assets whose cost does not exceed Rupees 5,000/- are depreciated fully in the year of purchase.
Where the asset capitalized has a fixed useful life, as in the case of software licenses, the same are written off over the said useful life.
Leasehold Property is being amortised over the remaining leasehold period on straight-line basis.
Software products both proprietary and purchased are amortized over a period of 5 to 6 years, the amortization commences once the said product is available for use.

The accounting policy followed by IRIS Business Services (Asia) Pte Ltd in respect following fixed assets is not in line with the policy followed by the holding company.

Fixed Asset	Rate followed by Subsidary	Rate followed by the holding Company
Furniture and Fixtures	33 % p.a.	20% p.a.
Office Equipment	33 % p.a.	20% p.a.

Considering the value of fixed assets held by Iris Business Services (Asia) PTE Ltd. and the depreciation thereon, the company is of the view that there are no material differences to the overall consolidated financial statement due to this different depreciation policy followed by the subsidiary.

g. Impairments
The carrying amounts of assets are reviewed at each balance sheet date, if there is any indication of impairment based on internal/ external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount.

h. Investments
Long term investments are stated at cost, and provision for diminution is made when in the management's opinion there is a decline, other than temporary, in the carrying value of such investments. Short term investments are valued at lower of cost and net realizable value.

i. Provisions and contingent liabilities
The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 **("FEMA")**. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("**RBI**") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India **("DIPP")**.

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment **("FDI")** through press notes and press releases. The DIPP has issued Consolidated FDI Policy Circular of 2017 **("FDI Policy 2017")**, which with effect from August 28, 2017, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2017 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI. In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under the current consolidated FDI Policy of 2017, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100 % foreign direct investment through automatic route is permitted in the sector in which our Company operates. Therefore applicable foreign investment up to 100% is permitted in our company under automatic route.

In case of investment in sectors through Government Route approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2017 has to be obtained by the Company.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, subject to fulfillment of certain conditions as specified by DIPP/RBI, from time to time. Such conditions include (i) where the transfer of shares requires the prior approval of the Government as per the extant FDI policy provided that: a) the requisite approval of the Government has been obtained; and b) the transfer of shares adheres with the pricing guidelines and documentation requirements as specified by the Reserve Bank of India from time to time; (ii) where the transfer of shares attract SEBI (SAST) Regulations subject to the adherence with the pricing guidelines and documentation requirements as specified by Reserve Bank of India from time to time.; (iii) where the transfer of shares does not meet the pricing guidelines under the FEMA, 1999 provided that: a) The resultant FDI is in compliance with the extant FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum capitalization, etc.), reporting requirements, documentation etc.; b) The pricing for the transaction is compliant with the specific/explicit, extant and relevant SEBI regulations/guidelines (such as IPO, Book building, block deals, delisting, exit, open offer/substantial acquisition/SEBI SAST); and Chartered Accountants Certificate to the effect that compliance with the relevant SEBI regulations/guidelines as indicated above is attached to the form FC-TRS to be filed with the AD bank and iv) where the investee company is in the financial sector provided that: a) Any 'fit and proper/due diligence' requirements as regards the non-resident investor as stipulated by the respective financial sector regulator, from time to time, have been complied with; and b) The FDI policy and FEMA regulations in terms of sectoral caps, conditionalities (such as minimum

capitalization, pricing, etc.), reporting requirements, documentation etc., are complied with.. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. *Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of* Our *Company*. Investors will not offer, sell, pledge or transfer the Equity Shares of our Company to any person who is not eligible under applicable laws, rules, regulations, guidelines. Our Company, the Underwriters and their respective directors, officers, agents, affiliates and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.
